The Maritime Regulation and Enforcement course examines the enforcement and regulatory powers of States in the various maritime zones of jurisdiction. It focuses on the prescriptive and enforcement powers of coastal States and the rights and freedoms of other States and considers policy and legal considerations in the development and enforcement of maritime jurisdiction.

The course includes the following topics:
- International law considerations in maritime regulation and enforcement
- Regulation and enforcement in internal waters, the territorial sea, the contiguous zone, archipelagic waters, international straits, the exclusive economic zone, the continental shelf and the high seas
- Legal aspects of regional cooperation in maritime enforcement
- Marine pollution
- Maritime security
- Piracy and counter measures
- Crimes at Sea: Australian legal framework

About ANCORS
ANCORS has an established reputation for expertise in ocean management and law, fisheries law and policy, and maritime security, in Australia, throughout the Asia-Pacific region and farther afield. ANCORS undertakes academic research and education, and also provides professional training, research services and other assistance to policymakers and regional organisations.
