## WHY STUDY OCEAN POLICY AND LAW?

UOW's Australian National Centre for Ocean Resources and Security (ANCORS) is Australia's only multidisciplinary university-based centre dedicated to research, education and training on ocean law, maritime security and the conservation and management of marine resources and biodiversity.

Benefit from the close links ANCORS has established with a range of government agencies, international organisations and non-governmental organisations in Australia, the Indo-Pacific region and globally, including a long-term relationship with the Royal Australian Navy.

Our research informs policymakers and contributes to real-world outcomes nationally, regionally and globally. Our research activities bring together ANCORS staff, Fellows and Higher Degree Research students around central research programs, reflecting our priorities and expertise in the areas of Ocean Law and Policy, Oceans Governance, Maritime Regulation and Enforcement, Maritime Strategy and Security, Fisheries and Food Security, Fisheries Management and the Marine Economy, Legal Regulation of Shipping, and Protection and Preservation of the Marine Environment.

## COURSE INFORMATION

### MASTER OF MARITIME POLICY / MASTER OF MARITIME STUDIES/ GRADUATE CERTIFICATE IN MARITIME STUDIES

Maritime Policy deals with policy, law and security issues related to the world's oceans. It addresses these issues in the contexts of trade, living and non-living marine resources, the sea as an important natural environment, monitoring, control and surveillance of marine activities and international political tensions and cooperation.

These degrees are designed to meet the early or mid-career education requirements of maritime professionals working in a policy or operational context, or those who intend to pursue a career in a maritime or related field. The Master of Maritime Studies degree includes a compulsory research project.

**Delivery:** Online, On Campus

**Duration (Masters):** 1 year (2 sessions) full-time, or part-time equivalent.

**Duration (Graduate Certificate):** 6 months (1 session) full-time, or part-time equivalent.

**Course Codes:** 1543/520/1139

### MASTER OF FISHERIES POLICY

Fisheries Policy addresses international, regional and national frameworks for sustainable fisheries management. It involves the important global issues of the links between fisheries and food security, and the tensions between the conservation of marine living resources for the future benefit of humankind and the economic benefits that fisheries can bring. Integrated monitoring, control and surveillance principles are promoted to ensure the achievement of fishery and environmental management outcomes.

The Master of Fisheries Policy degree is designed specifically for fisheries or environmental policy officers and mid-level managers or enforcement officers.

**Delivery:** Online, On Campus

**Duration:** 1 year (2 sessions) full-time, or part-time equivalent.

**Course Code:** 1621
